How to start a startup

# HOW TO START A START-UP

by Arno Vital

**live in the future,** ahead of your time

**what is missing** in the world?

**write it down** and bounce ideas around

**make a prototype**

**show the prototype** to 100 people

**launch** - let everyone know you have made something

**look for funding** and build version one at the same time

**register your Co-ops,** split **equity**

**find a co-founder**

**iterate on the prototype** until it makes sense

**1,000** get to 1,000 users

**grow 5%** a week (hard, but proven possible)

**keep growing** for quarters of years, and at that rate you will reach 20 million users

**follow up with users.** Are they using it yet?

**launch again** (after iterating) launch with users (AirBnB launched 3 times)

**SUCCESS**
