What is Helpmeet ?
Helpmeet is an application which provides transport resources to areas which an ambulance cannot cover.
Helpmeet unites all the distributed resources and acts like a medium between the help seeker and the service provider.
How does it work ?
One can open the application and report an accident. All the auto , cab drivers , car owners and other vehicles which are registered will be notified about the accident within 5 Km of the reported accident site.
This will enable them to reach out to the patients hence helping them reach the hospital.
