Making the curriculum more practical would help in building a better career for example when studying cs instead of saying this program does this more practical examples would help us face real time problems in our career or higher studies. Mathematics god knows why we are doing those sums. Instead before teaching problems if what they are used for would be very nice and intresting.

Subject & Paper *

mass communication

Academic Year *

2019-20

Did you find the syllabus adequate for *

○ Higher studies

○ Employability

◉ Skill Development

○ Others

If others , please specify *

By emphasising on practical inputs the syllabus emphasises on skill development for
employability. The theoratical components are good enough for nurturing interested students for
higher education.

What suggestions can you give for the improvement of the syllabus? *

Syllabus looks good. Focus can be on delivering the same.
