1. INTRODUCTION

Economy is highly influenced by the Financial System of that country. It basically comprises of two groups, ones with excess funds and ones with deficit of Funds. Financial System of the economy bridges a gap between these two groups by providing money to people who want from those who have. Mutual Fund industry has become a worthy option for Investment in our countries Financial Markets where majority of middle class families are those who want to get maximum return with a minimum risk and tax savings. The heart of a Mutual Fund lies in pooling money from various segments of stakeholders by issuing units, build a varied portfolio of shares, bonds and other investment devices, and finance the same in the Investment market. The main aim of Mutual Funds is to provide decent returns on the investment by lessening risk
