

Protective measures for COVID-19

2020-2021

Medical & Health Committee, BVC has taken all necessary steps in providing an interim guidance to the staff and students of the college to prevent spread of COVID-19 infection. Thermal scanners and pedal lifting hand sanitizing dispensers are arranged at the entrances as protective measure. Students and staff members are strictly instructed to wear face masks as they enter into the campus and maintain a physical distance of at least two meters with other person. The committee has taken care of disinfecting floors, workplaces, door knobs, handles and lifts with 1% hypochlorite and 5% Dettol. To keep students and staff aware constantly about the precautions to be taken, institutional guidelines are circulated. Posters on COVID-19 awareness were displayed at common places to keep the inmates at constant caution.

Stringent precautions were taken during conduct of semester end examinations. Sanitization of all examination rooms, corridors and washrooms was strictly adhered to the government protocols. Protective measures taken during examinations for students and staff at entrances and in halls were strictly monitored. Deputed faculty members along with Medical & Health committee members have given sincere efforts in monitoring the whole sanitization process in the campus.

During COVID-19 pandemic, the college campus was maintained as a highly protective zone and to make a point, not a single case of spread of infection was reported in the campus.
